

SWOSU Students Help with Physics Day

11.11.2008

Norman's Justin Silkwood, vice president of the SWOSU Physics Club, demonstrates how vortices of air can travel large distances.

Physics Club member Daniel Lundy of Cordell shows the strength of a large permanent magnet using a small iron bar.

Area high school students recently attended Physics Day activities on the campus of Southwestern Oklahoma State University in Weatherford. Students participated in hands-on activities and demonstrations led by SWOSU physics students and the Department of Chemistry and Physics.
